Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15 and 35-40, drawn to a method of making a nitrogen oxide sensing element and a sensing element made thereby, classified in class 65, subclass 17.2.
- II. Claims 16-34 and 41-46, drawn to a nitrogen oxide sensor including optical fiber interrogation, classified in class 385, subclass 12.

It is noted that the broad method steps of group I result in a device that is a subcombination of group II.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a sensing element of a different structure and composition could be used in the optical fiber based nitrogen oxide sensor. The subcombination has separate utility such as a sensing element which can be used in sensor systems that do not rely upon optical fiber interrogation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2874

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
